

# She thinks I still care

George Jones

[Verse 1]

C                      F                      C  
Just because I ask a friend about her,  
C                      G7                      C  
Just because I spoke her name somewhere,  
C                                      C7                      F  
Just because I rang her number by mistake today,  
C                      G7                      C  
She thinks I still care

C                      F                      C  
Just because I haunt the same old places  
C                                      G7                      C  
Where the memory of her lingers everywhere,  
C                                      C7                      F  
Just because I'm not the happy guy I used to be,  
C                      G7                      C  
She thinks I still care

[Bridge]

C    F                                      C  
But if she's happy thinkin' I still need her,  
C    G  
Then let that silly notion bring her cheer  
F                                      C  
How could she ever be so foolish,  
C    D7                                      G7  
Oh where would she get such an idea?

[Verse 2]

C                      F                      C  
Just because I ask a friend about her,  
C                      G7                      C  
Just because I spoke her name somewhere,  
C                                      C7                      F  
Just because I saw her then went all to pieces,  
C                      G7                      C    F  
She thinks I still care

C                      G7                      F    C  
She thinks I still care
